

Leveraged Loan Insight & Analysis – Fund Flows

LSEG | March 4, 2015

25, net flows turned negative once again with over \$118 million in outflows, bringing year to date total outflows to nearly \$2.7 billion. Still, this figure is substantially lower than the weekly outflow observed just a few weeks ago. Among HY bond investors, weekly inflows have not only remained steady, but strong, to push year to date totals to nearly \$11 billion.
